VOL. III, NO. 67. CINCINNATI, THURSDAY MORNING, MAY 3, 1860.

Marvelous Phenomenon A Star Destroyed Lescarbanit's Telescope and the New Planet. RAILWAY MATTERS. TRAINS DEPART.

LITTLE MILEY-17 minutes faster than City time,
6 A. M. and 11 P. M. Columbus Accommodation,
4 P. M. Xenis Accommodation, 6 P. M. The Russian correspondent of the London

Telegroph writes thus:

At Moscow a physical phenomenon has been recently observed, such as would have given rise to the creation of a whole cycle of fantastic myths in the times of the world's infancy. We learn from a paragruph in the leading paper of that city that, at a quarter past ten, on the nights of the first and second of March, a star to the south-west of the Great Bear suddenly commenced to wax larger, assuming, at the same time, the color of iron at a red heat, but without the appearance of any sparks or rays. In this condition the star appeared until half-past eleven, varying in the intensity of its light, and attaining the size nearly of the half-moon. A little before midnight the dimness began to increase, and at twelve o'clock the star had entirely disappeared. In its stead a surt of a Telegraph writes thus: CINCINNATI, HAMILTON AND DAVION-[7 minutes under than City time, | 8 A. M., 16:16 A. M., 2:30 P. M. and S P. M. Hamilton Accommodation, S A. M. and 3:50 P. M. Onto and Mississiper-12 minutes slower tha City time, | 4:25 A. M. and 5:35 P. M. Louisville than City time. | 6 A. M., \$130 A. M. and 6 P. M. MARIETTA AND CENCENNATE-[7 minutes faster than City time. | 5:45 A. M. and 3:30 P. M. COVINGTON AND LEXIBUTOS—[City time,] 6:50 A. M. and 2:10 P. M. LITTLE MIANI-3:50 A. M., S A. M., 11:04 A. M. entirely disappeared. In its stead a surt of a black speck was to be noticed by the light of the stars, which were unusually brilliant that evening. It remains for the astronomers to describe, and the poets to sing, the destruc-tion of the luminary, which, for ought we know, may have been the abode of a race su-rier to our own. Onto AND MISSISSIPPI-9:55 A. M., 12:28 P. M.

rier to our own. Unique Denoument to a Domestic Drama. The wife of a wealthy Cotton King of New Orleans, having occasion to suspect the fidelity of her spouse, recently followed him at a discreet distance, and seeing him enter a neat looking house in the second district, bolted in after him. The parlor being empty, the eager dame went into the bed room on the same floor, where she found her spouse scated in a chair, enjoying the charming society of a young lady who had not yet risen, and whom she at once recognized as a vaude-ville actress and singer in one of the French opera-houses. The scene which followed may be imagined. A day or two afterward, the wife and her rival met in a soda-water saloon, under the St. Louis Hotel, when the former, entirely beside herself with passion, would have attacked the actress with her parasol, but for the interference of bystanders. The Unique Denouement to a Domestic Drama.

out for the interference of bystander

out for the interference of bystanders. The actress meantime contented herself with repeating in mock-heroic style, "Do not forget, Madame, that you are a lady." The injured and irate wife was finally removed

from the scene. Southern Insolence to the Northern Union-Savens.—Even black-mail Hambleton is becoming ungrateful to Northern Union-saving Democrats, and says in a late number of his paper: "High prices for board, the hot climate, the fear of yellow fever and 'South-cra assassination,' has rid the convention and the city of many annoyances. Such is the dread of assassination by the Yankees that it is almost impossible to toll them from their ounters after nightfall. They retire early is almost impossible to toll them from their quarters after nightfall. They retire early, pray for the nomination of Douglas and their immediate delivery from so hot a climate. They try very hard to act like Southerners, by eating rice and turnip salad, but invariably retire from the table with potatoes and a lump of salt in their pockets."

EXTENT OF THE BUSINESS OF THE BANK OF ENGLAND,—In the Bank of England no fewer ENGLAND.—In the Bank of England no fewer than sixty folio volumes, or ledgers, are daily filled with writing in keeping the accountal To produce these sixty volumes, the paper having been previously manufactured else-where, eight men, three steam presses and two hand presses are cotinually kept going within the bank. In the copperplate print-ing department, twenty-eight housand bank notes are thrown off daily; and so accurately is the number indicated by machinery, that to purloin a single note, without detection, is to purioin a single note, without detection, impossible.

An Attorney Apt at Alliteration.—Durring the trial of a case in the second session of the Superior Court in Boston, recently one of the counsel who has a reputation for saying out-of-the-way things, asked a witness, "Now, sir, at the time the commercial crisis convulsed the community of this continent, and confounded the calculations of the cautious, how much was this lot of land worth?" To which the witness replied, "Let me G." One contented with what he has done ands but a small chance of becoming famous me C."

SUCCESS OF THE AMERICAN HORSES IN EN-GLAND.—At the late Newmarket Craven meeting, Mr. Ten Brock's "Pomona" beat "Desdemona" by three-quarters of a length, meeting, Mr. Ten Broeck's "Pomona" beat "Desdemona" by three-quarters of a length, in a race of five furlongs and 140 yards. At a subsequent 'sweepstakes, Mr. Ten Broeck's "Maggiore" came in second in a heat of three furlongs and 214 yards, having been beaten by Mr. Alexander's "Thanderbolk." In the former match, "Desdemona" led half way up to the cords, when "Pomona" collared her.

A PRER'S PECULIAR MODE OF SPEAKING Lord Granville, when he speaks in the Brit ish Parliament, always buries his hand in his coat pockets, and in the most wonderful way lifts his coat tail as if he were standing with his back to the fire, as if the portly person-ages behind were so many blazing faggots intended to warm him into life. Probably Granville, like General Scott, thinks he has a fire in the rear.

SUICIDE WHILE WATCHING OVER THE CORPSE OF A RELATIVE.—On Sabbath evening Wn. Payne died of congestive fever in Frankfort, Ky. His father-in-law, James Dryden, remained to watch the corpse during the night, and the ensuing morning was found dead with his throat cut. It is supposed that the sad act was occasioned by depression of spirits.

NEGRO TOLEBATION IN THE SOUTH.—Dr. Todd, of Pittsfield, Mass., preached at Charleston, S. C., a short time since, in the church founded by the Huguenot refugees, one hundred and seventy years ago. The congregation was mixed in color, part being black and part white. In the morning the whites occupied the center of the church, and in the afternoon they gave it up to the blacks, and sat on the outside themselves.

AN UNEXPROTED DEPARTURE.-The Cork (Ireland) Constitution tells the story that twenty-six persons, who went aboard a late steamer at Queenstown to see their friends steamer at Queenstown to see their friends off to this country, were carried away on the ocean voyage by the steamer, all unprovided as they were; many of them leaving their relatives, and even their horses and wagons

on the shore. THE FASTEST RAILWYY TIME YET MADE.—
A train on the Hudson River Railroad last Monday morning ran series miles in six minutes, between Albany an Castleton. This is believed to be the fastest time ever made in this country, being at the rate of seventy miles an hour. Luckily the train was for the carriage of payments.

carriage of newspapers, and not passengers. THE TEXTURE OF HUMAN GUMS,-Gum have hitherto been a puzzle to chemistry. M. Fremy believes that he has discovered the constitution of some of them. Gum Arabic, he thinks, is a gummote of lime, a combination of a very small quantity of lime with gummle acid. This is almost to simple to be

AN EXCITED DEMOCRATIC PARTISAN .-Democratic orator, addressing a meeting of his party in Philadelphia the other evening, exclaimed: "If any one dares to come into my neighborhood and preach such treason as that of G. W. Curtis and Wendell Phillips, by the ever-living God, he shall never leave the place alive!"

Lescarbanit's Telescope and the New Pianet.

The telescope with which Dr. Lescarbault discovered the new planet nearer the sun than Mercury, is very small. Its object-glass is only four inches in dismeter, with a focal length of less than five feet, and it is mounted on a wooden frame which admits only of two motions, one horizontal, the other vertical. It has a magnifying power of 150 times. From Dr. Lescarbault's observations, M. Le Verrier concludes that the new planet revolves around the sun in 1907 days; that the inclination of its orbit is 12° 10′, the longitude of its ascending node 13° 59′ and that that the inclination of 115 orbit is 12° 10°, the longitude of its ascending node 12° 50°, and that its mass is one-seventeenth that of Mercury. This mass is much too small to account for all the anomolies which have been observed in the movement of Mercury; the supposition is therefore strengthened that there is a group of these planets. The new planet can never be more than 8° from the sun, as seen from the earth. from the earth, so that it can never set more than half an hour after sunset or rise more than half an hour before sunrise. This, with its very small size, renders it easy for us to understand why it has never been observe

A Japanese Example for Roger A. Pryor A peculiarity of the people of Japan is their contempt of death, and a consequent proneness to commit suicide. We have read an exemplification of this, which contains a useful suggestion to the Virginia braves. Two officials jostled each other accidentally Two officials jostled each other accidentally on the palace steps. One, who was irascible, demanded satisfaction, which the more peace-loving dignitary gave in the shape of an ample apology. This did not suit the other, who was "spoiling for a fight." Secing that the peaceable party would not be provoked into a duel, what does our irate friend do but draw his own sword and clop himself up in the most approved style! As a matter of honor, his adversary was obliged to follow the example, and let daylight into himself in like manner. Will not Mr. Pryor try this plan when he runs against anothe

LADY MONTAGU'S LETTERS.—The writer in the Athenaum who watches over the interests of Junius and Pope, is extending his investigation to Lady Mary Wortley Montagu, and in an article of great research, proves conclusively that the present form of her well-known "Letters from the East" can not well-known Letters from the hast can not be the genuine one in which they were first written, and that probability is much against the authenticity of a large portion of the other correspondence attributed to her, and accepted, without scruple, by her descendant, Lord Wharencliffe.

MYSTERIOUS DISAPPEARANCE OF STRANGERS Two strangers who took lodgings recently a the Tontine Hotel, in Brunswick, Maine both disappeared on Sunday night, taking with them no outside garments, leaving a light burning in their room, and also a valu-able horse and buggy, together with wearing apparel and other articles of value. Nothing has yet been seen or heard of them, and their appearance and mysterious departure have aroused suspicions of foul play.

THE PRINCE OF WALES A SEDUCER.-Lady The Prince of Wales a Seroces.—Lady Clara Vane, says one of our foreign exchanges, has begun a suit against the Prince of Wales for seduction under the promise of marriage. The Prince is coming to America to avoid the Penalties of his conduct. Is this the result of the painfully pious rearing of the young Prince; or has the rein been held so tightly that, when once loosed, he has gone too freely into dissipation? A seducer of women at nineteen is an accomplishment not unworthy of Young America.

Cast-steel spades and shovels are now being manufactured at Sheffield. A piece of solid cast-steel is taken, into which, by powerful machinery, especially invented for the purpose, a hole, just large enough for the foot of the handle to enter, is made; afterward it is forced and harmoned down in the forged and hammered down to the required thickness.

ARREST OF A NEW ENGLANDER FOR FOR--A young man from Bristol, Rhode Island, son of a gentleman of the highest re-spectability, has been arrested in Havana for forgery, but was saved from the chain-gang by the American Consul-General, who thinks als father will refund the money obtained A New PRIMA DONNA,-The arrival from

Paris, by the steamship Arago, of Madame L Gomez de Wolowski, prima donna of the Royal Italian Opera, is announced. She is the wife of Mons. Alexander Wolowski, the pianist and composer, and is reported to en-joy a great European reputation. SERIOUS ACCIDENT FROM THE EXPLOSION OF

SERIOUS ACCIOEST FROM THE EXPLOSION OF ALCOHOL.—David Dennison, a druggist in Perth, C. W., was fatally burnt a day or two since by the explosion of a jar of alcohol, which he had placed upon a stove. He was terribly burnt, and suffered great agony.

Adam Isaacs Benicia.—Mrs. J. C. Heenan is playing in Richmond, Va. She appears as The Unprotected Female, and in the farce of "B. B., or the Benicia Boy." The "Benicia Boy" is indeed a farce if he allows his Adah to be thrown upon the charities of the world as an Unprotected Female.

A DETERMINED FIREMAN,-Horace Allen, a freman in Newport, R. I., stood six hours battling the flames at a late firs in that city, it was necessary at times to envelope him in wet blankets, as a protection against the

ENORMOUS RATE.-Forty enormous rate a arge as cats, it is said, were caught and frowned in a bath-tub, at the Bellevue Hos pital, New York, one night last week. They were probably in search of another infant to devour, when they met their untimely ends.

SUICIDE OF AN OLD CITIZEN. -Benjamin T White, an old citizen of Brown County, a most estimable and kind-hearted man, committed spicide by hanging, at Georgetown, in this State, last week, on account of his inemperance.

FICTITIOUS TELEGRAPHIC DISPATCHES.—A letter from Charleston, dated on Tuesday, says much amusement was created on the arrival of the New York papers, at the two columns of telegraph matter from Charleston, when it was patent that not half of it had passed over the wires.

MELANCHOLY DEATH ON THE CARS. Sarah Robinson, a woman whose friends live in Akron, died Friday morning on the cars of the Cleveland and Toledo Boad, while on her way home from Wisconsin. She was far gone with consumption, but hoped to get THE NEW DAILY IN NEW YORK .- The edi-

torial corps of The World, the new New York daily, will comprise J. R. Spaulding, late of the Courier and Enquirer, as chief, with Richard Grant White—Shakspeare's scholar—and Mr. I. Chamberlin, late of the Buffalo (N. Y.)

YIELD OF THE ARIZONA SILVER MINES.— The silver mines of Arizona are yielding large supplies. The Stephenson mine expects to have a hundred men at work upon it in a few months. The average yield of all the ores of the different veins will be \$175 to a tun of 2,800 pounds of ore.

Sad Sequel to the Story of the Stage-struck Telede Girl. We have already mentioned the case of s

girl who left her home in Toledo to follow, as it was said, the stage, but had disappeared near Detroit, and of her subsequent discovery; but it seems a painful fact, heretofore unknown, was connected with her disappearance, which a Detroit paper thus explains: J. B. Howard, a painter, of Toledo, a mar-ried man, quite intimate with her family, in-gratiated limiself into her affections, repre-sented that he disliked his wife, and would

sented that he disliked his wife, and would get a divorce and marry her—Myra Young. The confidence the young girl of eighteen years reposed in him was taken advantage of as early as July last, and the criminal intercourse continued till certain appearances indicated that to stay at home would result in the revealing of the disgraceful intimacy; accordingly she stole away from home on the 10th inst, arrived here, remained at the Russell House over night, and the next day, the 11th, went to Pontlac, where she has since remained. She bore the name there of Mrs. Howard. Howard visited her on the 12th and remained two or three days. His heartlessness will appear the more detestable when lessness will appear the more detestable when it is known that he was in the confidence of the family, was in the constant habit of visit-ing them, and actually assisted (apparently) in endeavoring to find traces of the missing LABOR, INDUSTRY AND WEALTH OF A SWISS

Crex.—A correspondent thus writes from Geneva, Switzerland: "The whole population appears to be prosperously engaged in some kind of industrial occupation, chiefly in jewelry and watch-making. Women and children even are able to earn money by some particular branch of these manufactures. Children of ten years earn five or six francs a week, and after a little time as much as ten or more. Many girls support themselves by sainting on enamel, or by engraving, and al-most every member of a family contributes a portion toward the common stock. Upward of 190,000 watchesare manufactured annually the 6,000 workmen engaged in the basi-s. The town has besides sixty goldsmith a shops. Trinkets and jewelry are no where so chesp as in Geneva. A good journeyman earns from thirty to forty francs a week. Disciplination of labor is carried to a great extent, since about eighty different machines unite their labor in the production of a watch, Perhaps there is no provincial town in Europe having a greater amount of wealth. rope having a greater amount of wealth. have seen an estimate made by one of the bankers, which gives eighty-one millionaires in a population of less than 60,000, the inhab-itants of the Canton.

EXTRAORDINARY ENDURANCE OF THE HUMAN THAME.—I'ew fully realize what the human rame can endure until it is fairly taxed. Selframe can endure until it is fairly taxed. Seldom has a better test been made than in the Arctic expeditions. During the voyage in search of Sir John Franklin, it was ascertained that the maximum weight proper for a man was 220 lbs; and of that weight, 3 lbs, per diem was consumed by each man, for food and fuel, namely, 1 lb, of bread and 1 lb, of meat, while the other pound comprised his spirits, tea, cocca, sugar, tobacco, and fuel for cooking. Upon this estimate it was found that, for a hundred days journey, they could march ten miles per diem, and endure with impunity a temperature of 50 degrees or 60 degrees below the freezing point.

Will of a millionaire, Aaron Leggett, was entered for probate in New York, on Wednesday. His wealth consisted largely of lands in the District of Columbia and Fairfax County, Virginia, including the celebrated Zephyr Farm there, which formerly belonged to George Washington. By a codicil the testator gives to a female slave named Daphne Kelley her liberty, and recommends his executors to purchase her husband, son-in-law, daughter and grand-childen, as worthy of being made free. It is supposed that the aggregate value of the estate is about \$2,000,000. WILL OF A NEW YORK MILLIONAIRE,-The

A NEGRO NOT AN AMERICAN CITIZEN.-Fred. Douglass, while in Newcastle, England, re-cently made application through the Ameri-can Minister in London, for a passport to enable him to visit Paris as an American citizen The reply made by the Minister was in effect that the Constitution of the United States did not recognize persons of color as citizens; the passport was therefore refused. Through the kindness, however, of the French Consul at Newcastle, the required permission has been

SUCCESS OF WORCESTER'S DICTIONARY .- Th Dictionary of Worcester has been virtually recognized as the standard in all the Departments of Government. It has been adopted officially by the United States Senate; is the standard work of reference in the office of the Clerk of the House; is the standard authority for the public printing and is also the standard. for the public printing; and is also the standard in all the publications of the Smithsonian In-

A CHILD POISONED BY 178 GRANDMOTHER, The Bangor (Me.) Whig reports that a little daughter of Mr. James Spratt, of that city, about two years and a half old, was poisoned at Venzie, on Saturday last, under most painful circumstances. The child was on a visit to its grandmother, who intended to give ita little gunpowder and milk, but accidently mixed fly-poison instead of powder. The child died in a few hours after taking it.

A RATIONAL CHINESE CUSTOM.—It is a pity that some of the Chinese customs are not adopted by the outside barbarians. For in-stance, in China people don't shake each other's hand; each shakes his own. The

workmen employed in repairs on the canal two miles below Circloville, in this State, struck for higher wages last week. They were receiving \$1 a day, but in consequence

THE SLAVE TRADE SETWERN PARAMA AND CURA.—The Panama Star reveals the exis-tence of the slave trade between New Gron-ads and Guba. Several parties of young persons of both sexes have recently been sent from Aspinwall to Cuba, under contract, but all intents and purposes as slaves.

The Hue or Leaves.—The coloring matter of leaves has been shown lately not to be simply green, but a combination of blue and yellow, to which in the autumn is in some instances added a red color. The change in the color of leaves during the latter part of the summer is due to the change in the proportions of these simple scelars.

A New THEORY CONCERNING THE BAROMETER.—M. Durocher, who has lately been making an excursion in Nicaragua, has propounded a theory of the diurnal variations of the barometer which he has been studying there. He attributes the variations to the tides produced in the atmosphere by the solar

MANUFACTURED AND FOR SALE BY CAMPBELL, ELLISON & CO.,

Nos. 19 & 21 East Second-st., jailet believe by CINCINNATI, OHIC.

THE "EROVAPOR COOKING-STOVE."
which uses neither wood nor coal, is now on exhibition and sale at the Sewing-amphine Establishment of E. E. Huggins, No. 16 Fast Fourthetrost, where all are invited to cast and examine it. The most striking seculiarity of this new arrangement consists in its not healing the apartment where cooking or itening is dure; at the same time the apart instance bear is presented. An amount of the first arrangement is to the form of the control o

EXTRAGADINARY RECOVERY PROM A HORRISTER WOUND.—A man in Marion, Mo., who had half his head knocked off in an afray some time ago, is out again well. No new bone had been deposited, but the skin has closed over the wound, and through it every pulsation of the brain may be distinctly felt.

adoption of this sensible practice would save many hatching shoulder-joints, to say noth-ing of the good it would do in clogging the propagation of skin diseases. STRIER ON THE CANAL.-Some seventy of working in the water they demanded twenty-five cents extra. To this their "boss" would not accede, and on Thursday they were paid off and discharged:

The Census and the Next Congress.—
The next census does not affect the Thirty-seventh Congress, as the law provides that Representatives shall be appointed decennially, and the first Congress, under the present apportionment, having met in December, 1853, the next Congress must be chosen under the census of 1850.

PRICE ONE CENT. A Perilous Feat-A Ranged Streamer Re-moved from the Spire of the Philadelphia

The attention of a very large number opersons was attracted the other morning, the movements of one of the workmen wh persons was attracted the other morning, to the movements of one of the workmen who has recently been employed in painting the State-house steeple in Philadelphia. The flag on the insin building had become entangled with a rod at the extreme top of the steeple, far above the ball and vane. For months the ragged remains of the attramer have been fluttering from the rod, and it seemed probable that they were destined to remain there until they should gradually rot away and blow off. This morning the workman alluded to, placed a ladder from the topmost scaffolding on the steeple, and by means of this he mounted upon the extreme top of the spire. By holding on to the rod he was enabled to maintain his footing, although the large gift ball was just above him. With one hand he held on to the rod below the ball, and he then made a long reach over and around the ball, and having obtained a hold above, a pole was handed up to him, and by means of it he natiently disentangled the fragments of the flag, and they were blown away by the wind. All this was accomplished with one hand, nearly two hundred feet above the ground, while he had but a mere tochold on the summit of the spire, and he was only able to hold on by reaching over the ball. After accomplishing the task the intrepid man descended in the same manner that he had mounted, and with as much apparent coliness as though he was creeping from a hay mow down to a barn floor. The lookers on gased with breathless attention at the feat, and very liberal sums were named as insufficient to induce the namers to attempt the same exploit. namers to attempt the same exploit.

A very remarkable fact comes out in con-mection with the volume of Lord Brougham's A very remarkable met comes out in connection with the volume of Lord Brougham's
"Mathematical and Physical Tracts," just
published by Messrs, Griffin. One of the
papers, on the subject of light and colors, was
published in the "Philosophical Transactions" for 1795. The copy sent to the Royal
Society contained remarks on the effect of
exposing a plate of ivory stained with nitrate
of silver to the rays of the spectrum, and
also on the result of submitting the plate to
the rays passing through a small aperture
into a dark room. These suggestions were
considered by Sir C. Blagden to relate more
to art than to pure science, and were accordingly omitted from the published copy. Had
they appeared, it is morally certain that they
would have led to the immediate discovery
of photography, fifty years earlier than its
actual introduction. In spite of its abstruse
nature, a new edition of the volume was required in a week.

A CHILD FATALLY BITTEN BY A HOUSE A CHILD FATALLY BITTER BY A HOUSE.

SNAKE—DEVOTION OF A MOTHER.—A day of two since, in Madison, Wis, a little child of Mr. Chillett nearly died from the bite of a snake. The mother had just stepped out of the house for a pall of water, and on her return found the child in spasms, and in a pile of dust near the child she discovered the trail of dust near the child she discovered the trail of a snake. Quick as thought she took the child and sucked some of the poison from the wound, which was in the arm. Its life is de-spaired of, however, and the mother is also sick, having, it is thought, swallowed some of the poison. The first warm weather induced the reptile to come up through the floor of the shanty.

A Scurnicous Editor Japansoned For Links.—J. Walter Walsh, editor and proprietor of a libelious sheet called the Sanday Varieties, published in San Francisco, was recently convicted of libelling a liquor seller recently convicted of libelling a liquor seller in that city, and sentenced to one year's imprisonment in the county jail. Walsh is a coarse, disgusting and unprincipled Irishman, and was formerly connected with the press of Louisville, Ky., under the soom dusplanes of "The Recluse." He ought to have been hanged long ago, and would have been had justice been dealt out to him for his many villainies. The carrier of this paper was also sentenced to thirty days' confinement in jail.

CAUSE OF THE VOLCANOES OF ME CAUSE OF THE VOLCANOES OF MEXICO. Geologists have hitherto supposed that the volcanoes of Mexico were produced by elevation; Humboldt in particular sustained this view, basing his theory on the supposed fact that there were no traces of lava streams proceeding from the craters. M. H. de Saussure, however, who recently ascended the sure, however, who recently ascended the peak of Orizaba, has found streams of lava radiating from the crater on every side. He considers that the volcanoes of Mexico were formed by volcanic accumulation entirely.

Annual of a Negro-strater.—A white man named R. R. Ringgold was recently caught in the act of escorting from the State of Alabama a black male "chattel" belonging to Rev. Mr. Andrews, of Burnsville, Dallar County. The couple had got as far as Camp-bell County, Georgia, when they were over-hauled and taken to Montgomery City, when the friends linked together like "hooks o steel" were exhibited to a delighted crowd Ringgold will probably be hung by a mob.

Mode of Determining Dampness.-The fol lowing rule is given for determing whether a house or room is too damp to be occupied with safety: Put a quantity of quickime, freshly burnt, in a vase and expose it uncovered in the house or room after shutting the doors and windows. If at the end of twenty the safety is the safety of the control of the four hours it has gained in weight one five hundredth, it is safe; if more than one-hun-dredth, it is very unsafe. Between these two extremes it is more or less healthy.

DISAPPEARANCE OF A PAIR OF FREE-LOVERS A man named Wenner, living near Adrias Seneca County, mysteriously disappeared last Tuesday, leaving a wife and two children Wenner's wife's sister mysteriously disa peared about the same time, a fact that peop in Seneca County couple with Wenner's di appearance

A PRUSSIAN OFFICER EXLISTING SOLDIES FOR THE POPE.—Some surprise has been of casioned at Laybach, by the appearance ther of a Prussian officer of the line in fall uniform, who enlists recruits for the service of the Pope, at one of the public hotels, and it i stated that his success is far beyond his exnectations.

DEATH OF A HOUSE PROM GREEF FOR A COURSE FRIEND.—A very interesting ctory is old in the Monitour des Sciences of a Lors that died of grief on being separated from another horse with which he had lived long His disease was called "a pendo-madnes entirely 'moral, brought on by regret at sep-aration from an affectionate companion, and increased by isolation."

LUMINOUS FLASHES IN PLANTS.—Recent ob-servations show that certain plants have, un-der certain circumstances, the property of emitting luminous flashes. This has been observed lately in the botanic garden at Up-sala, in Sweden, by a large number of per-sons. The plant was the paparer orientals. METHOD OF PROLONGING LIFE.-The Vi

counte de Lapause has just published a volume on the preservation and prolongation of life. He believes it quite possible to extend life considerably by means which he points out, and in the end to restore the life of men to its antedilovian length. ESCAPE FROM JAIL OF SIX APRICAN MUSparas.—The Tallahassee Floridian Tearns hat the six negroes belonging to Major J. B. Watts, who were confined in the Madison

jail, under sentence of death for the murder of their overseer, M. D. Griffin, broke jail on Monday night last.
